

A Fresh Approach to Managing Medical Bills

Eastern Alliance’s focus on early intervention and proactive disability management produces better outcomes that matter to your employees and your bottom line. Our knowledgeable professionals use proven claim handling and medical care management measures that return injured workers to wellness faster and reduce your claim costs. Eastern directly applies these savings to the medical portion of your claim total. With medical bills accounting for almost 60% of the total cost of a workers’ comp claim, this can really add up.

All carriers apply the fee schedule reduction and the PPO fee reduction to a medical bill.
